Summary

My passion lies in the **web development**, where **React** is my specialty and **Flutter** my complement for cross-platform solutions. With a strong backend orientation, I delight in **designing** and building systems characterized by their simplicity and **efficiency**.

I use **Figma** to bring my ideas to life, ensuring that every application I create is not only robust and easy to maintain, but also an **exceptional user experience**.

Education

Web Application Development

Sept 2023 – Junio 2025

Higher Technician in Web Application Development

- **Note:** 8,23
- **Subjects:** Web Development in Server/Client Environments, Web Interface Design, Web Application Deployment, ...

Experience

Full Stack Flutter Dev Intern

Keskuskatu, Finlandia

Casamedia.ky [site](#) [🔗](#)

Marzo 2025 – Julio 2025

- Increased security by 85% by improving middleware for permission management.
- Developed migrations and seeders from scratch to manage persistent data between versions and created scripts to streamline this process.
- Tested and debugged REST API endpoints with Postman during development and integration.
- Utilized advanced Flutter concepts and widgets for application state management (ChangeNotifier, Provider, Consumer).
- Redesigned the Kanban and projects pages for mobile and web adaptability.
- Improved Kanban data structure by changing data relationships to one-to-many.
- Modernized and refactored backend documentation to be more beginner-friendly.
- Performed as an instructor for new interns.
